#### **DETAILED ACTION**

### Specification

The disclosure is objected to because of the following informalities:

The recitation "spacer flanges 30" on line 8 of page 7 should be changed to ---spacer flanges 34---.

The recitation "vertical posts 31" on line 2 of page 8 should be changed to ---vertical posts 30---.

The recitation "horizontal rack 32" on line 2 of page 8 should be changed to --- horizontal rack 31---.

The recitation "front rail 33" on line 3 of page 8 should be changed to --- front rail 32---

The recitation "flaring plates 34" on line 3 of page 8 should be changed to --- flaring plates 33---.

Appropriate correction is required.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmaling (US 5,209,467) in view of Meyers (4,364,504).

Application/Control Number: 10/712,029 Page 3

Art Unit: 3654

In regards to claims 1 and 6, Schmaling discloses guide for controlling web material in laterally separate paths from web supply machine, comprising:

a frame extending transversely feed direction of the web, as seen in Figure 1;

at least one pair of laterally separated guide rails 16, 18 running parallel the feed direction, each guide rail comprising an upper and a lower strip, respectively, the strips defining a guided passage from an entrance end to an exit end the guide rail, as seen in Figures 1 and 4;

the guide rails being laterally displaceable on the frame, as seen at 26;

the exit end of each guide rail connectable to a machine, and

a line up means 14.

Meyers teaches guide rails 50, 51 as flexible strips.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the guide strips of Schmaling to include flexible guide strips as suggested by Meyers, to accurately direct the web

The recitation in the preamble of claims 1 and 6 that the guide is for use with a machine for producing packaging blanks, relates only to a possible or intended use of the device being claimed, but does not further structurally limit the device.

In regards to claims 3 and 4, Schmaling as modified by Meyers discloses the guide rails 16,18 are controlled for lateral displacement in mutually opposite directions.

In regards to claim 5, Schmaling as modified by Meyers discloses vertical side shields of the guide rails 16, 18 as seen in Figure 3.

Application/Control Number: 10/712,029 Page 4

Art Unit: 3654

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schmaling in view of Zernov et al. (US 3,667,751).

Zernov teaches at least two pairs of guide rails 40.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the web guide of Schmaling to include at least to guide rails as suggested by Zernov, to guide webs through different feed paths.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schmaling in view of Joice (US 4,252,233).

Joice teaches a web feed apparatus feeding a web to a guide device that is fed by a capstan 12.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the line up means of Schmaling to include a capstan as suggested by Joice, to provide stable feeding means.

Allowable Subject Matter

Art Unit: 3654

Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

# Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan H Langdon whose telephone number is (571)272-6948. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
